Effective development is our business.

Key Goals/Outcomes

The goal of the ANTARA Program is to reduce poverty in Nusa Tenggara through sustainable and equitable social and economic development. The Program will initially focus on East Nusa Tenggara (NTT) and subsequently expand into West Nusa Tenggara (NTB) – two of the poorest provinces in Indonesia.

The ANTARA Program objectives are to:

- Improve provincial and district governance.
- Improve incomes for women and men.
- Improve access to and quality of basic services for women and men.

Program Scope

Australia-Nusa Tenggara Assistance for Regional Autonomy (ANTARA) Program is a flexible, demand-driven, programmatic approach to regional development.

Cardno Acil provides quality management assistance to the Program through the Management Support Team (MST).

To effectively support ANTARA implementation, we will bring the breadth of Cardno Acil's experience in program management, including with the MST model. This support will enable the Program to:

- Promote synergies between Government of Australia activities.
- Pioneer initiatives to test what works in the region.
- Strategically invest in other existing or emerging Government of Indonesia or donor programs.
